Monday 5 August 2019

TUMUT HOSPITAL REDEVELOPMENT DESIGN ON DISPLAY

The Health Minister Brad Hazzard unveiled the latest design for the $50 million Tumut Hospital Redevelopment as part of his recent visit to Tumut, and ahead of the project team holding community drop-in information sessions in August.

The project is moving through the planning and design phases in 2019, with a commitment for funding in the recent 2019-20 NSW Budget.

As part of ongoing community consultation and engagement, the Redevelopment’s latest design and layout, known as the schematic design, will be available on:

<table>
<thead>
<tr>
<th>Thursday 15 August 2019</th>
<th>5.30pm to 7pm, upstairs Tumut Bowling Club, 24-30 Richmond St in Tumut</th>
</tr>
</thead>
<tbody>
<tr>
<td>Friday 16 August 2019</td>
<td>9.30am-11am, 76 Wynyard St outside Tumut Newsagency in Tumut</td>
</tr>
</tbody>
</table>

The schematic design is currently available online here as well as being on display in the Hospital’s main entrance.

Murrumbidgee Local Health District Chief Executive Jill Ludford said, “The Redevelopment will mean all clinical services and support services are brought under the one roof on the health campus, in a new single storey building for the modern delivery of health care.

“This is in contrast to the existing layout of the Tumut Hospital and the location of services in several, outdated buildings.

“I’d encourage members of the local community to attend a drop-in information session in August to receive an update from the Redevelopment Project Team and view the latest design of their new Tumut Hospital.”

The Redevelopment includes:

- Emergency Department
- Inpatient Unit
- Birthing Unit
- Operating Theatre and Day Surgery

healthdirect – 24 hour health advice and information you can count on 1800 022 222.
Wellness Centre including community health, community mental health, community drug and alcohol services; outpatient services such as rehabilitation, specialist clinics, wound care; ambulatory services such as renal dialysis, infusion/transfusion services; and space for education and group therapy services.

- Quiet room for families and a Cultural Room
- Clinical support services including a Medical Imaging Unit; Pharmacy; and Pathology with one-site laboratory
- Administration and non-clinical support areas
- New Helipad.

The Redevelopment will also see landscaping, dedicated parking for staff and service vehicles and the demolition of old buildings.

Construction is scheduled to commence by the end of 2019 and expected to be completed in late 2021. This will be followed by an operational commissioning phase, prior to the transfer of services from the existing hospital and the commencement of clinical operations from the new hospital.
